NetSuite to Google Sheets
INTEGRATION

by PKF Digital

NetSuite users have multiple saved searches that they utilise within their NetSuite instance to run their business.

They often need to:

- toggle between these saved searches in NetSuite,
- download data into Google Sheets/Excel or a BI tool, and
- manually manipulate this data to produce the desired results.

⯮⯮ SOLUTION:

PKF Digital has developed a solution to automate this process, providing users with a secure and efficient way to view this data.

Users do not need to login to NetSuite to access these reports.

ORACLE NETSUITE ⯮⯮⯮⯮⯮⯮⯮ Google Sheets

With PKF Digital's NetSuite to Google Sheets Integration Solution, users now have the ability to automatically display multiple saved searches in Google Sheets.

This data can be displayed in consolidated tabs, graphs or any other display options offered by Google Sheets.
